

CRAIG MIDWINTER

SOFTWARE ENGINEERING LEADER

craig.j.midwinter@gmail.com | 1 (204) 899-2852 | Winnipeg, Manitoba, Canada | github.com/craigjmidwinter

EXECUTIVE SUMMARY

Engineering leader with a record of transforming delivery culture in established teams. Experienced scaling and leading 50+ engineer organizations through significant operational change — moving teams from legacy processes to modern, agile, ownership-driven engineering practices. Skilled at aligning technical strategy with commercial goals, building high-performing teams, and operating effectively in fast-paced, outcomes-focused environments.

CORE COMPETENCIES

Engineering Leadership at Scale • Engineering Culture & Delivery Transformation • DevOps & CI/CD • Cloud-Native Architecture • Distributed Team Leadership

EXPERIENCE

Hypergiant / Accelint (acq. Trive Capital PE)

2019 – Present

Director of Engineering

- Scaled and led an engineering organization of 50+, spanning multiple product lines and client-facing delivery and staff augmentation
- Scaled delivery practices incrementally as teams grew — introducing sprint cadences, standups, and retrospectives progressively based on team size and need rather than imposing process upfront
- Sole engineering leader through significant organizational restructuring, realigning team structure and priorities to sustain delivery and morale
- Redesigned engineering processes in response to client requirements and security threats, improving operational resilience and delivery predictability
- Partnered with product and design leadership to drive roadmap clarity and execution velocity
- Coached and developed engineers, engineering managers, and technical leads to grow in their roles and take greater ownership of outcomes

Lead Software Engineer

- Designed and built backend systems for a satellite fleet management prototype in C# / .NET on AWS Lambda, including a satellite data simulation service; collaborated with hardware team on shared C# libraries
- Led development on Hyperdrive, a Kubernetes-native ML-Ops platform enabling scalable, reproducible model training and deployment pipelines for enterprise users
- Led CommandCenter, a geospatial visualization platform — improved Product/Engineering collaboration, reliability and key feature delivery
- Automated infrastructure with Terraform, Kubernetes, and Flux, reducing setup time and boosting deployment confidence

Pepper.com

2015 – 2019

Backend Developer

- Built and optimized backend services using PHP, Node.js, PostgreSQL, and Redis, improving scalability and reliability for a global user base
- Reduced response times and server load by implementing caching strategies and refactoring performance bottlenecks
- Delivered new product features and third-party integrations, modernizing a legacy codebase

Shaw Communications

2007 – 2015

Predictive Dialer Coordinator / Master Control Operator

Early career roles spanning broadcast systems, call centre operations, and backend development. Built internal tooling and integrations across legacy platforms using PHP, MySQL, JavaScript, jQuery, and Visual FoxPro — including a real-time agent productivity dashboard integrated with a legacy FoxPro dialer, and a modern web client giving editors live access to a legacy MS Access newsroom database.

SKILLS

Languages: C#, Node.js, TypeScript, Go, JavaScript, PHP, Python

Frameworks: .NET Core, React, Next.js, Express, Apollo, Gin, FastAPI

Cloud & DevOps: AWS, GCP, Azure, Kubernetes, Terraform, Flux, Docker, GitHub Actions, CI/CD, Linux, Nginx, Kafka

Databases: PostgreSQL, MySQL, Redis, Memcached, Elasticsearch, DuckDB

Other: Microservice Architecture, REST API, GraphQL, Infrastructure as Code, Unity VR/XR, WebXR, 3D Visualization

OPEN SOURCE

Honeywell Total Connect Python Library

Maintainer

Author and maintainer of a standalone Python client library for the Honeywell Total Connect API, used by multiple applications including a Home Assistant integration that allows users to automate their alarm systems.

VOLUNTEER EXPERIENCE

Thistle Curling Club Board of Executives

2015 – 2023

Communications, Member at Large

Served on the board for eight years, contributing to club strategy and governance while owning all club communications.

EDUCATION

Red River College

Computer Analyst / Programmer | Winnipeg, Canada | 2007–2008 (Incomplete)
